Experience

UX & UI Designer, Frontend Developer

Bubble Meets, San Francisco, CA / May 2021 - August 2021

- Served as a bridge between the design and development teams, working along the entire feature pipeline to ensure strong communication.
- Responsible for creating high-fidelity mockups and converting them into re-usable React code.

President, Web Designer

DouxDolci Web Design, Stony Brook, NY / July 2018 - Present

- Worked closely with a variety of clients in designing and building custom WordPress websites.
- Skilled in defining pain points and making improvements through client feedback and product iteration.

CEO, UX Engineer

Second Desk LLC, Stony Brook, NY / March 2021 - Present

- Conducted user research, gathered feedback, and created UIs.
- Used modern React methods and best web design practices to create a responsive and performant website from the group up.
- Created cloud-based Windows and Linux VMs that enabled users to remotely connect and run specified workloads.

Skills

UX & UI

- Experience with conducting user research and user-centered design.
- 4+ years of experience designing responsive, SEO-optimized websites.

Frontend Development

- 3+ years of experience with semantic HTML5, responsive flexbox and grid in CSS3, and dynamic styling in JS.

Education

Rochester Institute of Technology

January 2022 - May 2024

Majoring in Human-Centered Computing
